

Fine Needle Aspiration, Project 23

Client: Dr. Frederick Kelcz

Team Members: Kristen Seashore (Leader)
Tu Mai (Communicator)
Chris Goplen (BWIG)
Jason Tham (BSAC)

Date: 9/8/06 to 9/15/06

Problem Statement: To be determined.

Individual Goals for Next Week:

Kristen Seashore: Research fine needle aspiration, types of tissues, and biopsies.

Tu Mai: Research fine needle aspiration and biopsies.

Chris Goplen: Research fine needle aspiration, current devices, and needles.

Jason Tham: Research fine needle aspiration and current/related devices.

Summary of Accomplishments:

- The team met in class on Friday and designated team roles. Tu sent an email to our client and set up our initial meeting for Wednesday afternoon.
- Tu, Chris, and Kristen met with Dr. Kelcz on Wednesday to determine the project goals and specifications. He gave us ideas for how he imagines the final product, and for what he thinks is feasible in a semester. We received a budget of \$1000 for materials.
- The team met in class today and began writing our PDS. We set up a team meeting for Tuesday night to finish our first draft. We also designated research roles for each member.

Statement of Team Goals: Research fine needle aspiration and other topics related to our project.

Project Schedule: This week we will begin research of our project and current devices. We will also write the first draft of our PDS.

Difficulties: No difficulties this week.

Activities:

09.08.06	Team met in class to designate roles and email client	2 hrs
09.13.06	Tu, Chris, Kristen: met with client to determine project specs	1 hr
09.15.06	Team met in class to begin PDS and determine next week's goals	2 hrs

Project Time Line: To be determined.

Expenses: No expenses this week.
