Problem Statement:
Our goal is to design a custom warning system for a girl with cerebral palsy so that others in her path will be warned of her presence. Currently there is no system that can be attached to her wheelchair to alert the person controlling her wheelchair of any incoming traffic.

Restatement of team goals:
1. Create Problem statement
2. Create First draft of PDS
3. Begin to research and develop design ideas
4. Continue the design project.
   a) Research all possible background information.
   b) Research existing and design alternatives
   c) Brainstorm for all possible solutions
   d) Meet with experts to gain ideas about possible solutions
c) Develop possible design solutions
5. Choose final three design solutions
6. Develop final three solutions
7. Create Power point presentation
8. Finish mid semester report, PDS
9. Discuss possible final design alternative
10. Finalize Design
11. Build and test prototype
12. Present final design

Last week’s goal
1. Set up the circuit

Summary of Team Accomplishments:
1. Set up the circuit for the buzzer and light.

Summary of Individual Accomplishment:
1. YikNing wrote progress report
2. Farshad obtained information for the wheelchair
3. Jimmy researched for switches and tested with and built a testing circuit
   with switches and light bulb

Statement of Team Goals:
1. Build the circuit
2. Build external for the circuit design
