

Team Members: **Dan Jonovic** – Team Leader
 Andrew Dias – BWIG
 Nick Balge – BSAC
 Whitney Johnson –Communications

Advisor: Professor Mitch Tyler

Client: Dr. Bikash Pattnaik

Next meeting: 11/21/08, 12:05pm

Problem Statement:

Create a system controlled through LabVIEW to monitor, control, and record values from an ERG corresponding to liquid exchange, light intensity, flash duration and frequency, and waveforms. In addition, the development of a new, more user-friendly interface should be implemented.

Team Goals:

Successfully save a file of the data recorded in a format legible by other programs (notepad, excel, etc).

Individual Goals:

Dan Determine which error is preventing the program from saving data.
Andrew Attempt to implement a save feature through the excel toolkit.
Nick Format the data (to be saved) so that it is legible in an external program.
Whitney Continue refinement of the user interface

Summary of Accomplishments:

We redesigned the user interface and met with the valve group to verify we can integrate their portion into our design.

Difficulties:

The save feature has been difficult to repair.
