Problem Statement:

To be developed following formulation of the product design specifications.

Summary of Accomplishment:

We currently have an appointment to meet with the client on 2/6/09. The team leaders dispersed introductory instructions to prepare for the semester working with this client. The list of things to do includes: obtain a TB test/TB test record, become acquainted with client's research, look over prior work on the project and obtain a shop permit.

Statement of Team Goals:

The team hopes to acquire the client's goals in order to clearly define product design specifications in order to move forward towards a "formal brainstorming session".
